DESCRIPTION OF AMENDMENT

This text amendment makes changes to the City’s Infrastructure, Conservation and Coastal Management, and Intergovernmental Coordination Elements of the Comprehensive Plan. The purpose of these amendments is to comply with Section 163.3177(6)(c), Florida Statutes, which requires local governments to adopt/update a Water Facilities Work Plan within 18 months after the adoption of a Water supply Plan by the Water Management District of jurisdiction.

In January 2017, the St. Johns River Water Management District approved the Northeast Florida Regional Water Supply Plan. As required by State Statutes, the City must update the Water Supply Facilities Work Plan (WSFWP) in the Comprehensive Plan by July 2018.

The City notes that the future year population projections represent a decrease from the projections provided in the last update of the WSFWP in 2010 (approximately 12.5% in 2035). This decrease in population projection in turn reflects the decrease in the water demand and need for alternative water supply in the updated WSFWP.

To meet demand and comply with the requirement to utilize alternative water supply sources, the City will seek to draw 1.0 MGD from alternative supply source by 2030 and 2.0 MGD by 2035. This alternative water supply source is expected to potentially include brackish groundwater from the Upper Floridan Aquifer and Lower Floridan Aquifer, surface water, treated concentrate, and reclaimed wastewater.

1. ADVERSE EFFECTS TO SIGNIFICANT REGIONAL RESOURCES AND FACILITIES IDENTIFIED IN THE STRATEGIC REGIONAL POLICY PLAN

This amendment does not create any adverse effects to significant resources or facilities.

**2. EXTRAJURISDICTIONAL IMPACTS INCONSISTENT WITH THE
COMPREHENSIVE PLANS OF LOCAL GOVERNMENTS WITHIN THE REGION**

No extra-jurisdictional impacts that would be inconsistent with the Comprehensive Plan of an affected local government were identified.
