

Brian is a Vice President with Jones Edmunds & Associates, Inc. and serves as the firm's Managing Director of Infrastructure. He has dedicated his professional career to serving cities, counties, and state governments in Florida – using best practices and the latest technology to solve their stormwater, water, and wastewater challenges. His experience includes leading projects in stormwater master planning and design, water/wastewater design, and asset management. Brian loves all things water. He works with it professionally and enjoys being around it for fun. He was born and raised in Tallahassee, graduated from the University of Florida's College of Engineering, and is a licensed professional engineer.
