

Dr. Angela Schedel

Dr. Angela Schedel is the Director of Community Resilience at Taylor Engineering in Jacksonville. She is a retired Naval Officer, having served 25 years as a helicopter pilot and an engineering professor. A sixth-generation Florida native, she grew up in Tampa and has degrees in Ocean Engineering from the U.S. Naval Academy and Civil Engineering from the University of Maryland. Her research, including her dissertation entitled "Sea-Level Rise and its Economic Effects on Naval Installations," has earned her recognition as a subject matter leader in sea level rise and adaptation solutions. She recently served on the U.S. Naval Academy's Sea Level Rise Advisory Council, helping the historic institution identify its vulnerabilities and adapt to sea level rise. When not in the office, she enjoys spending time in, under and on the water.
